<https://www.linkedin.com/in/ronald-miranda-data/>

I'm highly skilled and possess a bachelor's degree in Systems Engineering. My education provided me with the hands-on training and technical knowledge I use to be successful in my career. Such as advanced knowledge in Java, JavaScript(React), Php and SQL (MySQL and PostgreSQL), intermediate in Python language.

As a result of my studies and interest I possess strong experience developing web pages as well programming languages which include JavaScript (React) and SQL Databases. Additional knowledge of API, Linux and Git.

I'm passionate about learning every day, especially new languages or technologies. I'm familiar with designing and implementing websites, and I feel confident I can make positive contributions. As a positive and enthusiastic team member, I'm passionate about supporting my colleagues and am eager to learn from the experienced professionals
